START YOUR SAVINGS JOURNEY TODAY

We've already helped millions of households cut their energy spend through our award-winning High 5 campaign, but the work doesn't stop there. We're going to be with you 365 days a year to guide you on the best ways to save all year round.

Each season has its own dedicated tips, so by following the campaign throughout the year you can maximise your energy saving potential.

To keep up to date on additional ways to save and how to put these tips into practice, be sure to follow us on social media.

Making these simple tweaks to the way we use energy at home can make a huge difference to your pocket and the planet.*

*All energy usage data is based on Energy Saving Trust Infact Report (September 2019 / June 2021) and Utilita's Review of the Energy Cost of Cooking (September 2022). All energy costs are based on the Government Energy Price Cap (July 2025). Savings may vary as many factors will be important in determining your actual savings. These figures are based on using these tips all year round.

CHILL OUT AND SAVE ENERGY

January – March

Cold temps don't always have to mean big spending. We've picked our Winter tips to help you freeze excess energy usage and make smarter energy choices.

Have a go at batch cooking your favourite warming stews or putting on an extra layer and turning the heating down by 1 degree. These easy-to-use tips will make saving energy and £££s easier than ever before!

Make 5 simple changes to the way we use energy at home:

Save £48

Batch cook when possible

Save £36

Simmer rather than boil

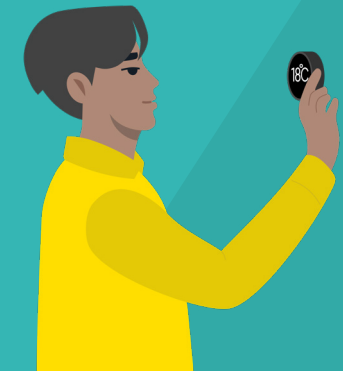

Save £8

Always fully load the washing machine

Save £135

Turn the heating down by 1 degree

Save £15

Swap one bath per week for a 4 min shower

SPRING INTO ACTION

April – June

Just as the days start to get brighter, so can your energy-saving potential.

While the days are getting longer and your opportunities to explore the outdoors in the light increase, make sure you're unplugging your gadgets when you're out and about to avoid any unnecessary extra spends.

*Safety alert – This relates to combination boilers only and NOT for boilers using hot water tanks. If in doubt, please visit www.hse.gov.uk/healthservices for more detail.

Make 5 simple changes to the way we use energy at home:

Save £68

Set your hot water tap temperature to 50C*

Save £49

Avoid standby and unplug gadgets

Save £38

Use the right size pan with a lid

Save £81

Use the most efficient cooking appliance

Save £15

Wash laundry at 30C instead of 40/60C

SAVE FOR THE SUMMER

July – September

The Summer sun naturally brings your energy spend down. So while your central heating is on holiday, why not make small changes around your home to save even more for the colder months ahead?

Warmer climates and brighter days are a great opportunity to make the most of natural resources. Maximise the benefits of the sun by air drying your laundry outdoors. Plus, by opening your curtains instead of turning the lights on, you'll save £££s with some natural brightness.

Make 5 simple changes to the way we use energy at home:

Save £66

Keep showers to 4 mins maximum

Save £49

Avoid standby and unplug gadgets

Save £36

Simmer rather than boil

Save £57

Air dry laundry when possible

Save £23

Switch off lights in unoccupied rooms

UNBE-LEAF-ABLE ENERGY SAVINGS

October – December

While leaves may be falling from the trees, our Autumn energy saving tips can help your energy costs fall as well.

Try utilising the best cooking appliance for the meals you are making. How about using a slow cooker for your casserole instead of the oven? And when making your favourite hot drinks, measure out the right amount of water so you're not wasting energy or time by overfilling your kettle.

*Safety alert – This relates to combination boilers only and NOT for boilers using hot water tanks. If in doubt, please visit www.hse.gov.uk/healthservices for more detail.

Make 5 simple changes to the way we use energy at home:

Save £81

Use the most efficient cooking appliance

Save £49

Avoid standby and unplug gadgets

Save £42

Use a plug when washing up

Save £68

Set your hot water tap temperature to 50C*

Save £10

Avoid overfilling the kettle

How much does it cost to cook?

In partnership with Iceland, we've come up with more ways you can save £££s in the kitchen. Switch the appliances you cook with to unlock more saving potential.

Appliance	Day	Week	Month	Year
Electric cooker	26p	£1.86	£8.06	£96.71
Dual cooker	23p	£1.58	£6.87	£82.38
Gas cooker	9p	£0.64	£2.76	£33.16
Slow cooker	9p	£0.60	£2.61	£31.35
Air fryer	8p	£0.53	£2.31	£27.67
Microwave	4p	£0.30	£1.31	£15.75
